

Comprehensive Rehabilitation Unit

DRH Health's Comprehensive Rehabilitation Unit (CRU) provides intense rehabilitation through physical, occupational, and speech therapy, along with daily physician oversight and rehabilitation nursing. Our professional treatment team designs an innovative plan of care focused on your specific needs of recovery.

COMPREHENSIVE REHABILITATION

We are dedicated to return every patient to their optimum level of function and to maximize independence through sustained recovery after discharge.

For certain patients, acute rehabilitation is the best setting for intensive treatment toward recovery and a return to independence.

Patients who benefit from intensive care in an acute rehab setting may have experienced the following:

- Amputations
- Brain Injury
- Closed Head Injury
- Congenital Deformities
- Hip Fractures
- Joint Replacements
- Neurological Disorders: Multiple Sclerosis, Parkinson's Disease, Guillain Barre, Encephalopathy, Critical Illness, Myopathy/Polyneuropathy
- Multiple Trauma
- Muscular Dystrophy
- Orthopedic Impairments
- Polyarthritis, Severe or Advanced Osteoarthritis
- Spinal Cord Injury
- Stroke
- Other Diagnoses: congestive Heart Failure, Coronary Artery Bypass Graft, Myocardial Infarction, Laminectomy, Pneumonia, Respiratory Failure, Neuropathy

A pre-admission assessment screening is conducted to assess each patient's appropriateness for the program. For more information, to request an on-site patient evaluation or to arrange a tour of a facility, please contact us at 580-251-8100.
