

## Outpatient Pediatric Therapy

At DRH Health Outpatient Rehab, we offer specialized outpatient pediatric occupational, physical and speech therapy services. We strive to ensure treatments are meaningful, fun, and interactive!

# OUTPATIENT PEDIATRIC THERAPY

Children are encouraged to learn how to sense, move, communicate and develop their language, cognitive skills, self care and motor skills. Our licensed therapists have specialized pediatric training and experience to help prioritize a child's needs and help families achieve their goals while maximizing the child's independence. Our scope of practice is birth through adolescence.

Services and Interventions our team provides:

## Occupational Therapy

Interventions Include:

- Fine motor development
- Self-care training to improve independence
- Core and upper extremity strengthening for improvement of motor planning, balance and coordination
- Sensory Integration

## Physical Therapy

### Interventions Include:

- Aquatic therapy
- Assessment for orthotic needs and referrals
- Balance training and functional training
- Pelvic Floor: Bowel and Bladder
- Car seat assessments
- Wheelchairs and other durable medical equipment evaluations
- Gross motor development
- Strengthening, balance and coordination

## Speech Therapy

### Interventions Include:

- Feeding and swallowing issues, including food aversion
- Speech sound production: articulation, apraxia of speech, dysarthria, ataxia, dyskinesia
- Resonance: hypernasality, hyponasality, cul-de-sac resonance, mixed resonance
- Voice disorders
- Phonation: quality, pitch, loudness, respiration
